**BIBLIOGRAPHY**

12.1-12.3  **Papers Published**

3. Hubbard, M.J., Dent, P., Smythe, C., and Cohen, P.: Targetting of protein phosphatase-1 to the sarcoplasmic reticulum of rabbit skeletal muscle by a protein that is very similar or identical to the G-subunit that directs the enzyme to glycogen. Eur. J. Biochem. (1990) 189: 243-249.

18. Dent, P. and Sturgill, T.W.: Activation of (His)\textsubscript{6}-Raf-1 in vitro by partially

50. Vrana, J., Grant, S., and Dent, P.: MAPK and JNK1 activities in HL-60 cells over-expressing Bcl-2 after exposure to ionizing radiation; possible roles of these pathways in leukemic cell survival. Radiation Res., (1999) 151: 559-569.

via Transforming Growth Factor alpha in autocrine-regulated carcinoma 

57. Park, J.S., Reardon, D.B., Carter, S., Fisher, P.B., Schmidt-Ullrich, R.K., 
and Dent, P.: Mitogen Activated Protein (MAP) kinase pathway signaling 
is required for release / progression of cells through G2/M after exposure 

58. Taher, M.M., Baumgardner, T., Dent, P., and Valerie, K.: Genetic 
evidence that stress-activated protein kinase-2 alpha is necessary but not 
sufficient for ultraviolet light activation of HIV gene expression. 

Phosphorylation Loop Domain Increases Resistance of Human Leukemia 
Cells (U937) to Paclitaxel-Mediated Mitochondrial Dysfunction and 

60. Bondzi, C., Dent, P, and Krystal, G.: Ras-GTP loading by itself is 
insufficient for SCF-mediated Raf activation: requirement for Src family 

61. Hagan, M, and Dent, P.: Inhibition of the MAPK pathway radiosensitizes 

on taxol-induced apoptosis and cytotoxicity in human leukemia cells 

63. Park, J.S., Qiao, L., Yang, M.Y., Darlington, G., Firestone, G.L., Fisher, 
P.B. and Dent, P. A role for Ets and CCAATT (C/EBP) transcription factors 
in the MAPK-dependent increase in p21\textsuperscript{Cip-1/WAF1} protein levels in primary 

64. Park, J.S., Boyer, S., Mitchell, K., Gilfor, D., Birrer, M., Darlington, G., El 
Deiry, W., Firestone, G.L., Munger, K., Band, V., Fisher, P.B., and Dent, 
P. Expression of human papilloma virus E7 protein causes apoptosis and 
inhibits DNA synthesis in primary hepatocytes via increased expression of 

Grant, S., and Dent, P. Inhibition of the mitogen activated protein kinase 
pathway potentiates radiation-induced cell killing via cell cycle arrest at the 
G2/M transition and independently of increased signaling by the JNK/c-

76. Bowers, G., Reardon, D., Hewitt, T., Dent, P., Mikkelsen, R.B., Valerie, K., Lammering, G., Amir, C., and Schmidt-Ullrich RK. The relative role of ErbB1-4 receptor tyrosine kinases in radiation signal transduction...

106. Cartee L, Sankala H, Davis C, Smith R, Maggio S, Lin PS, Dent P, Grant S. 7-Hydroxystaurosporine (UCN-01) and ionizing radiation combine to inhibit the growth of Bcl-2-overexpressing U937 leukemia cells through a

137. Lammering G, Hewit TH, Valerie K, Contessa JN, Amorino GP, Dent P, Schmidt-Ullrich RK. EGFRvIII-mediated radioresistance through a strong

147. Gupta S, Natarajan R, Payne SG, Studer EJ, Spiegel S, Dent P, Hylemon PB. Deoxycholic acid activates the c-Jun N-terminal kinase (JNK) pathway...

164. Rubén W. Carón 1,4, Adly Yacoub 1, Clint Mitchell 1, Xiaoyu Zhu 1, Young Hong 1, Takehiko Sasazuki 3, Senji Shirasawa 3, Michael P. Hagan 1, Steven Grant 2 and Paul Dent. Radiation-stimulated ERK1/2 and JNK1/2 signaling can promote cell cycle progression in human colon cancer cells Cell Cycle (2005) 4: 60-72.

185. Gao N, Rahmani M, Shi X, Dent P, Grant S. Synergistic antileukemic interactions between 2-medroxyestradiol (2-ME) and histone deacetylase inhibitors involves Akt down-regulation and oxidative stress. Blood. 2005 Sep 1; [Epub ahead of print]

197 Dai Y, Hamm TE, Dent P, Grant S. Cyclin D1 Overexpression Increases the Susceptibility of Human U266 Myeloma Cells to CDK Inhibitors Through a Process Involving p130-, p107- and E2F-Dependent S Phase Entry. Cell Cycle. 2006 Feb 15;5(4) [Epub ahead of print]

Dasmahapatra G, Nguyen TK, Dent P, Grant S. Adaphostin and bortezomib induce oxidative injury and apoptosis in imatinib mesylate-resistant hematopoietic cells expressing mutant forms of Bcr/Abl. Leuk Res. 2006 Feb 13; [Epub ahead of print]
